COMPREHENSIVE EASY TO USE SUPPORT 3D DESIGN

LandStar7 is the field-proven survey and mapping software solution for any Android devices and CHCNAV data controllers. Designed for high precision surveying and mapping tasks, LandStar7 provides seamless workflow management, easy-to-learn and easy-to-use graphical user interface to complete all your projects efficiently. Comprehensive data import and export formats, multiple measurement and stakeout methods ensure instant productivity.

EASY WORKFLOW FROM FIELD TO OFFICE

Support various import and export format types.
LandStar7 imports and exports DXF, SHP, KML, KMZ, CSV, DAT, TXT; as well as fully customized data content from the survey project choosing CSV, DAT or TXT formats.

BACKGROUND BASEMAP OVERLAY

Locate and visualize your project data at a glance.

LandStar7 integrates Google, OSM, BING and WMS online maps to provide meaningful location information to surveyors and construction professionals. Projects are visualized within their regional terrain or satellite images in real-time.

FEATURE RICH ANDROID SURVEY SOFTWARE

Highly versatile and ready for multiple applications.

LandStar7 is designed to provide you with exceptional feature sets, from land surveying, construction and engineering projects, mapping, GIS data collection, road stakeout to pipeline survey. Its customizable user interface keeps LandStar7 easy-to-use by focusing on essential

DESIGN FOR SURVEYORS BY SURVEYORS

Agile software development process.

Our LandStar7 development team keeps permanent contact with surveyors, construction professionals and our worldwide partners network to bring new outstanding functionalities. When using LandStar7 today, you are ensured to benefit from regular new features at no extra cost.

SPECIFICATIONS

Features

Intuitive workflow
Comprehensive Import/Export Format support
Standard CGD correction file
Repeater correction function
RTCM message
Intuitive system menu
Manage receiver firmw are update
Customizable layer display
Real-time global TEC map
Connection types (Bluetooth, Wi-Fi and demonstration)
Embedded e-manual
Powerful COGO tools (earthwork, inverse, grid to ground,...)
GNSS RAW data recording
Measurement geofencing
Site calibration with advanced quality control
Multi-language interface
Cloud service
Voice or sound prompt
Landscape mode
Tilt measurement
Data quick share
Physical keyboard shortcut

Field Hardware Support

CHC GNSS receivers (including i90, i80, i70, i50, M6 and X91+)
Android smartphone and handheld controller with internal GPS
Peripheral instruments such as generic NMEA0183 receivers, pipeline detector and laser rangefinder

Data Collector Support

CHC HCE320
CHC LT700 / LT700H
Android devices (operating system 4.2 and higher)

Operating System

Android 4.2 and higher

License

Online software registration

Communication Protocols Configuration

CHC
Transparent
TT450
SATEL_3AS
PCC4FSK
NTRIP
TCP Direct
APIS

Supported Languages

Bulgarian
Chinese (Simplified)
Chinese (Traditional)
Croatian
English
Finnish
French
German
Greek
Hungarian
Japanese
Korean
Mongolian
Persian
Polish
Portuguese
Russian
Slovak
Spanish
Thailand
Turkish
Vietnamese
